Research Interests

My research focuses on the intersection of technology (i.e., computing, virtual environments), psychology, and sex/gender studies. I consider myself a multi-disciplinary researcher and have published in the areas of human-computer interaction, software engineering, technical education, human sexuality, evolutionary psychology, and sociology (popular culture), with much of my research focusing on sex or gender issues in these areas. I am always seeking to expand in new directions and acquire further breadth in my perspectives.
